

Tenable Information Security Training Organization Subscription Programs

Tenable Network Security understands that there are those in the Nessus community that serve broad information security educational objectives and we want to make certain that qualified information security teaching/training organizations have access to the Tenable plugins free of charge. To this end, Tenable will provide subscriptions to information security teaching/training organizations at no cost for those that qualify for training purposes only.

Training: Nessus and network scanning curriculums

If your information security teaching/training organization uses Nessus in your curriculum to teach students how to scan for network vulnerabilities, the Tenable license allows you to use the HomeFeed subscription for your training purposes as can be found in Tenable's HomeFeed and ProfessionalFeed Subscription Agreement.

Program Rights, Requirements, and Limitations:

- You are permitted to copy/build images and redistribute Tenable's Nessus and Tenable HomeFeed Plugins to students in and for the classroom setting only. Upon completion of the class, the ability to use the Plugins provided by the HomeFeed is terminated and students must re-register for either a HomeFeed or a ProfessionalFeed according to their intended use as is governed by the Subscription Agreement.
- Information security organizations and students are not permitted to use the HomeFeed in a commercial fashion to secure their organization's or third party networks. It is only to be used for demonstration and teaching purposes in structured class environment.
- If you qualify for the right to use a Tenable subscription for your teaching/training organization, you are required to review the license agreement in its entirety.
- You will have the right and may use the Nessus logo in your marketing of the class(es). If you choose to use the Nessus logo, it must always be accompanied by the following: "Nessus is a Registered Trademark of Tenable Network Security, Inc.".
- Tenable reserves the right to revoke a free subscription or terminate a subscription at its sole discretion at any time.

Training: Nessus and compliance, configuration, and SCADA curriculums

If your information security teaching/training organization uses Nessus in your curriculum to teach students how to do agent-less audits for compliance, configuration or SCADA, Tenable will provide access to a free ProfessionalFeed subscription for those that qualify.

To register your information security training organization with Tenable to qualify for the use of ProfessionalFeed subscriptions in your class(es), you will need to complete the following webform (https://plugins-customers.nessus.org/quoterequestForm_training.php) and provide the information outlined below by fax (410-510-1889) or via email to: infosectrainingPF@tenablesecurity.com:

1. Public documentation for the existence of the training
2. A copy the curriculum substantiating the existence of Tenable's Nessus as part of the class

ProfessionalFeed subscriptions are limited to 1 subscription per information security organization class.

Program Rights, Requirements, and Limitations:

- You are permitted to copy/build images and redistribute Tenable's Nessus and Tenable HomeFeed Plugins to students only in the classroom setting but you are not allowed to distribute or redistribute the ProfessionalFeed Plugins. Upon completion of the class, the ability to use the Plugins provided in the class is terminated and students must re-register for either a HomeFeed or a ProfessionalFeed according to their intended use as is governed by the Subscription Agreement.
- Each information security training organization can register for only one ProfessionalFeed per class for instructor demonstration and teaching only.
- Information security organizations are not permitted to use the ProfessionalFeed in a commercial fashion to secure their organization's network or third party networks. It is only to be used for demonstration and teaching purposes in class.
- If you qualify and are granted the right to use a Tenable subscription for your teaching/training organization, you are required to review the license agreement in its entirety.
- You will have the right and may use the Nessus logo in your marketing of the class(es). If you choose to use the Nessus logo, it must always be accompanied by the following: "Nessus is a Registered Trademark of Tenable Network Security, Inc.".
- Appropriate subscription length will be determined by Tenable upon your acceptance into this program.
- Tenable reserves the right to revoke a free subscription or terminate a subscription at its sole discretion at any time.
